DATE MAILED: 04/19/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/600,546

Applicant(s)

BALDINI ET AL.

Examiner

Alvin J Stewart

Art Unit

3738

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 January 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 20 June 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 11/23/04; 3/18/05
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Response to Arguments

Claims 21-25 are cancelled.

The Examiner has made a new ground of rejection after reading the Applicant's arguments. However, claims 15 and 16 are maintained because they are not claiming the method of digital representation of a socket.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-10, 12-17 and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by document "Selective Laser Sintering Streamlines Prosthesis design" Machine Design, Penton, Inc. Cleveland, US, vol. 65, no: 3, February 12, 1993, page 77, ISSN: 0024-9114.

Machine Design discloses a method of making an implant comprising generating a digital representation of a three dimensional surface contour that depends on a physical surface contour of at least a portion of a residual limb. Generating a digital representation of a socket of the prosthetic limb and forming the socket out of physical material using a digitally controlled layered manufacturing technique.

Claims 15, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Clynn et al US Patent 5,432,703.

Art Unit: 3738

Clynch et al discloses a method of forming a socket comprising positioning a liner (25) on a portion of a residual limb, forming a socket having an exterior surface and a cavity defined by an interior surface such that the interior surface of the socket has a contour that is dependent upon the exterior surface contour of the liner and attaching the socket of the prosthetic limb to the residual limb.

Claims 15, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Caspers US Patent 5,376,132.

Caspers discloses a method of forming a socket comprising positioning a liner (42) on a portion of a residual limb, forming a socket (110) having an exterior surface and a cavity defined by an interior surface such that the interior surface of the socket has a contour that is dependent upon the exterior surface contour of the liner and attaching the socket of the prosthetic limb to the residual limb.

Regarding lines 10-12 of claim 15, the interior surface of the socket (110) has a contour that is dependent upon the exterior surface contour of the liner (42) because the interior and exterior contour of the liner adjust at the contour of the residual limb. Therefore, if the interior and exterior contour of the liner have the same contour as the residual limb then the interior surface of the socket will have the same contour as the exterior surface contour of the liner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 11 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over document "Selective Laser Sintering Streamlines Prosthesis design" Machine Design, Penton, Inc. Cleveland, US, vol. 65, no. 3, February 12, 1993, page 77, ISSN: 0024-9114 in view of Clynych et al US Patent 5,432,703.

"Selective Laser..." discloses the invention substantially as claimed. However, "Selective laser...." Does not disclose the step of positioning at least one artifact adjacent the residual limb prior to electronically scanning the exterior contour of the liner.

Clynych et al teaches a step of positioning at least one artifact adjacent the residual limb prior to electronically scanning the exterior surface contour of the liner for the purpose of holding the patient in a standing position.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to hold the patient in a standing position.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
